                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 18, Application US/08861338

Patent No. 6174993

GENERAL INFORMATION:
GENERAL INFORMATION:
GENERAL INVENTION: SHORT PEPTIDES WHICH SELECTIVELY
TITLE OF INVENTION: MODULATE THE ACTIVITY OF SERINE/THREONINE KINASES
NUMBER OF SEQUENCES: 22
CORRESPONDENCE ADDRESS:
ADDRESSEE: Hamilton, Brook, Smith & Reynolds, P.C.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Gaps
                                                                                                                            ;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            .

Sequence 18, Application US/08861338
Patent No. 6174993
GENERAL INFORMATION:
APPLICANT: Ben-Sasson, Shauel A.
TITLE OF INVENTION: MODULATE THE ACTIVITY OF SERINE/THREONINE KINASES
NUMBER OF SEQUENCES: 22
CORRESPONDENCE ADDRESS:
ADDRESSEE: Hamilton, Brook, Smith & Reynolds, P.C.
STREET: Two Militia Drive
CITY: Lexington
STATE: Massachusetts
COUNTRY: USA LOCATION: 7 OTHER INFORMATION: /note= "Glutamic Acid Benzyl Ester" COUNTRY: USA
ZIP: 02173
COMPUTER READABLE FORM:
MEDIUM TYPE: Floppy disk
COMPUTER: IEM PC COMPALLDLe
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.30
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/08/861,338
FILING DATE: 21-MAX-1997
CLASSIFICATION: 514
ATTONNEY/AGENT INFORMATION:
NAME: BROOK, David B.
REGISTRATION NUMBER: 22,592
REGISTRATION NUMBER: 22,592
REGISTRATION NUMBER: 22,592
REGISTRATION NUMBER: 22,594
TELEFRANCE/DOCKET NUMBER: 22,594
TELEFRANCE/DOCKET NUMBER: 2440
TELEFRANCE/DOCKET NUMBER: 2440
TELEFRANCE CHARACTERISTICS:
SEQUENCE CHARACTERISTICS:
TEMMTH: 9 amino acids LOCATION: 1 OTHER INFORMATION: /note= "N-Acetyl Leucine" TYPE: amino acid STRANDEDNESS: not relevant TOPOLOGY: not relevant MOLECULE TYPE: peptide NAME/KEY: Modified-site FEATURE:
NAME/KEY: Modified-site
LOCATION: 9 NAME/KEY: Modified-site US-08-861-338-18
